

**Qfc07: the universal head
for brush cutters with medium
and small engine capacity**

Qfc07: born for lawn cutting and garden cleaning in general.

100%
MADE IN
ITALY

5 good reasons to choose the cutting system Qfc07

100%
MADE IN
ITALY

1 Blades replacement in 10"

Opening, closing and changing blades: in just three simple steps the head will be ready for use: the special clamping system makes both the opening and closing movements of the head almost automatic.

2 Ideal for finishing operations

4 types of blades for 7 different types of cutting, to solve even the finishing most specific situations. From standard cutting to "Scattering" effect.

3 Total absence of problems

The only concern is the replacement of the blades: a fast operation, simple and handy.

4 Universal for all machines

Thanks to a universal mounting system it is possible to mount the head on any brush cutter, of any brand and engine capacity.

5 Head of higher and guaranteed durability

Head made of technopolymers, simple and robust. Moreover, the aerodynamic profile of the blade reduces fuel consumption and power consumption, increasing wear resistance and tensile strength: does not stick and does not tear.

*Special PROFILE
ANTI-AGAINST
GRASS WINDING
even of high and
filamentous grass*

INTERNATIONAL
PATENTED

COMPATIBLE
with all modes
of brush cutters and
of any engine capacity

 **WEIGHT: 186 g**

The heart of the cutting system: 2 types of blades, specific for lawn shaving and tall grass cutting

The structural design of the blade has pursued the achievement of a shape capable of maximizing the **cutting action**. The effectiveness and efficiency of the blades is guaranteed by three main features, linked to the four types of blades with specific functions and features:

- 1) **Cutting part in three different forms** (MonoFly, MonoSega, MonoElica)
- 2) **Superflexible zone** between the cutting part and the buttonhole
- 3) **Same-size and shape buttonhole** for all the blades.

Why is the cutting more effective than the common round wire?

There are **3** reasons:

1) **The ellipse section** of the cutting part of the blade provides a lower resistance to air and allows with the same nominal size (A), a **speed of rotation increased by 10%** compared to round wire. (fig. 1)

It also allows flexibility in the vertical direction and a strong rigidity in the horizontal plane (cutting plane). The outer parts of the ellipse have a diameter less than 50% compared to the nominal size (A) with correspondingly greater cutting effect (fig. 3). This allows to work even at low running speeds (the round wire to work must be taut and consequently be with a greater revs number).

2) **The flexible area** (between the cutting part and the eyelet) enables the blade to **adapt**, even in the presence of resistant obstacles.

3) **The eyelet allows an oscillation (R) of 240°** which, combined with the flexible area, reduces to zero the possibility of breaking down. (fig. 2)

Fig. 1

The blade which is free to flex when it meets obstacles makes possible the use of the brush cutter also to a lower number of revolutions of the engine, **allowing the use also close to the plants without damaging the stem.**

A sharp capacity similar to a mower

These lamella characteristics make the shaving clear and precise, as if cut by a lawnmower (fig.3). A cut of this type avoids the grass being pulled out as in most cases, thus becoming yellow after a few hours.

Recommended uses

ENGINE POWER recommended	BLADE: TYPE AND SIZE (mm)	2 BLADES
>1000 W < 30 cc	 MONOFLY™ 1,6 - 2,0	 - Grass
	2,4 - 2,8  - Tall grass	
>1000 W < 30 cc	 MONOSEGA™ 1,6 - 2,0 - 2,4	 - Tall grass

Packs

	DIMENSIONS MM	N. OF PIECES PER PACK	MINIMUM LOT	PACK CODE
 MONOFLY™ For lawn cutting	1,6 - 6	20 pieces for blister	10 blister	10139010
	2,0 - 6			10139011
	2,4 - 6			10139012
	2,8 - 6			10139013
 For lawn cutting	1,6 - 6	40 pieces for blister	5 blister	10139020
	2,0 - 6			10139021
	2,4 - 6			10139022
	2,8 - 6			10139023
 For lawn cutting	1,6 - 6	20 pieces for bag	10 bags	10139030
	2,0 - 6			10139031
	2,4 - 6			10139032
	2,8 - 6			10139033
 For lawn cutting	1,6 - 6	40 pieces for bag	5 bags	10139040
	2,0 - 6			10139041
	2,4 - 6			10139042
	2,8 - 6			10139043
 MONOSEGA™ Specific for tall grass and for "Scattering" effect	1,6 - 6	20 pieces for blister	10 blister	10139014
	2,0 - 6			10139015
	2,4 - 6			10139016
	1,6 - 6			40 pieces for blister
2,0 - 6	10139025			
2,4 - 6	10139026			
 Specific for tall grass and for "Scattering" effect	1,6 - 6	20 pieces for bag	10 bags	10139034
	2,0 - 6			10139035
	2,4 - 6			10139036
 Specific for tall grass and for "Scattering" effect	1,6 - 6	40 pieces for bag	5 bags	10139044
